

Prototype Build Plan

Stage 4 - Plan the smallest testable version, then spend your time making it.

Learning goal

What should the learner practice?

Learner action

What should the learner retrieve, compare, explain, decide, make, or reflect on?

Prototype question

What do you need this first version to help you learn?

Smallest version

What can one person actually try?

AI role

Is AI part of the product, or helping the team create/build it?

Materials / platform

What do you actually need?

SCOPE RULE: Build only enough for one person to try the key interaction.
