

Empathy Map

Stage 1 - Use interview notes. Write evidence first; keep guesses separate.

What are they trying to do?

Observable goal.

What do they currently do?

Actions or strategies.

What have they already tried?

Supports or approaches.

What did you hear or see?

Direct quotes, actions, examples.

WHAT WE STILL THINK OR NEED TO TEST

Where does it seem to get hard?

Best guess - not a diagnosis.

What should we learn more about?

Open questions.

CHECK BEFORE YOU MOVE ON

Circle evidence on your map. Underline anything that is still a best guess. Discuss it with a partner or facilitator.
